

Simcoe Stone Social Media Expansion Proposal

Hey Mark [Simcoe Stone],

We'd like to thank you from us here at **Alta AI Consult** for **starting your journey with us into the world of AI automated social media!** You're already set up with our **Social Pro** package and your new automation system is working beautifully. Now, it's time to take it a step further and **bring your brand to life online** with the **Social Motion Package** + optional maintenance upgrade.

We want to make sure that your social media is not only set up and automated, but ready to take a step further in the content world with the right branding, promos, social reels and more to give your page the facelift that it needs to hit the ground running, and give it the professional modern look that it needs!

There are two offers we have for you to extend your social media journey which we feel will be absolutely crucial in the long run. We understand the busy days of business owners, content creation can be such a drag and putting the time into doing it isn't as easy when you're talking to clients and setting up deals all day. So, we got a deal for you. **We will create 15-30 days worth of scheduled social content, which includes high quality branded photos, trending and engaging reels, videos, captions, story posts, the whole kit, bang and kaboodle! This allows us to create a schedule and spread out the content for you, so you can make sure there is something that will always be posted.** We feel this is the most effective way to start your business on social media and make sure you have the right look going forward.

Fact: More than 80% of Social Media (Instagram/TikTok/FB etc) users will have more buyers confidence when visiting pages that have 50+ posts on their page. This shows customers that you are consistent, reliable and more importantly verifiable. It gives them more confidence to decide to reach out to you!

Secondly, we are also offering you our **Monthly Maintenance** which allows you to completely have your automation on auto-pilot with support. Making sure everything runs smoothly. **The best and most important thing is with this as well, it allows us to increase the file size limit of what you can upload through drop box from 5MB to 100MB,** giving you flexibility for higher quality images and videos. Both offerings are below, along with your guide to your current automation!
